MAAP Colombia: Chiribiquete - Deforestation Hotspots in the Colombian Amazon, part 3

MAAP #86: Deforestation Hotspots in the Colombian Amazon, part 3: Chiribiquete-Macarena

We present our third report* in a series investigating **deforestation hotspots** in the **Colombian Amazon**. Here, we focus on the **"Chiribiquete-Macarena" hotspot**, located between the Chiribiquete and La Macarena National Parks.

The Colombian government is finalizing plans to expand the boundaries of **Chiribiquete National Park**, an important step for conservation. However, we show (with **high-resolution images**) that deforestation is surging in the area and rapidly expanding towards these new boundaries. In fact, in 2018, deforestation has entered the newly expanded park.
